Individual All Season Vehicles

BERGECRAFT
2008 Multi-functional all-season rescue vehicle for
mountain rescue service and other kinds of
rescue service

Multi-functional all-season rescue vehicle for mountain rescue service and other kinds of rescue service

The Bergecraft 2008 is based on an adapted version of the Polaris Ranger 6x6. This vehicle is a very robust allrounder and perfect for all terrains. It takes no more than one hour to change from wheel drive to caterpillar drive, which makes the Ranger 6x6 and hence the Bergecraft 2008 an all-season vehicle suitable at any time and any place.

The Bergecraft 2008 was designed for individual mountain rescue service and other kinds of rescue service in close co-operation with specialists in these areas. Thanks to its limited width and its remarkably low centre of gravity it can reach places that up to now could only be accessed on foot or by helicopter.

Inside the Bergecraft 2008 up to two paramedics can care for the patient and monitor him (optional equipment). The Bergecraft 2008 comes with a first-aid backpack (expanded first aid backpack

or backpack for emergency doctors are optional)

There is plenty of storage space for other accessories like materials for dressing wounds and splinting too.

Thanks to its low-pressure tires the Bergecraft 2008 can operate in remote areas without damaging crops.

The Bergecraft 2008 will be available as of the beginning of 2008 and will be fitted and equipped the way you wish! Contact us and let us know your preferences!

Technical data:

	BERGECRAFT 6x6
Engine	Polaris 4-stroke twin cylinder
Fuel	unleaded petrol
Carburation	Electronic Fuel Injection (EFI) by Buch, with automatic regulation of height, pressure and temperature
Displacement	683 cc
Power	30 kw / 40 hp
Maximum speed	70 km/h (country-specific)
Transmission	automatic
Drive	fully suspended drive, rear and front differential lock, 4WD can be activated electronically
Suspension	independent suspension, MacPherson strut, third axis as swing arm construction
